

Hawaii

Kona Blend

Kona coffee grows only on a small strip of land along the western coast of Hawaii's Big Island, in the shadow of the Mauna Loa volcano. When the white flowers bloom in winter, they call it "Kona snow." This rare coffee is hand-picked, dried in the sun, and has a distinctively sweet flavor.

We blend Kona with select South American arabica coffees to enhance its character. The result is a smooth, mellow flavor with nutty notes and a crisp finish. A truly world class coffee!
